A) Species
B) Community
Environment: x² = 0.0203***
Species Associations: x = −0.0081*, x² = 0.0061
Space: x² = 0.0159***
Variance explained
Response to Summer Temperature
Environment: x² = 0.0064*
Species Associations: x = 0.0084*, x² = 0.0120***
Space: x² = 0.0050
Summer Temperature
Environment: x = 0.0568***
Species Associations: not retained
Space: x = 0.0646***
Response to Freezing Degree Days
Environment: not retained
Species Associations: not retained
Space: not retained
Freezing Degree Days
Environment: x = −0.0325*, x² = 0.0614*
Species Associations: not retained
Space: x = −0.0386*, x² = 0.0708**
Response to Annual Evapotranspiration
Environment: x = −0.0053, x² = −0.0027
Species Associations: x = 0.0054, x² = 0.0029
Space: x = −0.0046
